

## C7 STINGRAY, LEVEL – 1 CURRICULUM:

The Level-1, Ron Fellows Performance Driving School is open to all driving experience levels.

From our fleet of Corvette's, students will drive C7 Stingray's with the Z51 option package (Z51 options include electronically controlled limited-slip diff; closer gear ratios; dry-sump oil system to prevent engine oil starvation on the race track; additional cooling for brakes, diff and gearbox; larger brakes; aerodynamic pieces and larger wheels and tires). All school Stingray's are equipped with Michelin Pilot Super Sport tires.

Our curriculum focuses on developing your individual car control skills and performance driving techniques. Understanding the performance capabilities and features of the new C7 Corvette Stingray are important elements of our program. Instruction includes comprehension of the 5-position Driver Mode Selector, Active Rev Matching and Launch Control features. And our fleet of Stingray's are equipped with 2-way radio communications providing students with constant interaction with their instructor.

Our step-by-step curriculum includes dynamic car control exercises on a wet and dry skid-pad, dry handling oval exercises, visual skill development, proper cornering techniques, lead and follow with our instructor team and open lapping track time. Throughout our program you will also learn to manage the performance enhancements of the 7<sup>th</sup> generation Corvette.

Classroom sessions are short but informative. Our exhilarating vehicle exercises and precision focused track time will help you gain knowledge and confidence in yourself and the new Corvette. Corner-approach techniques are critical, which is why we begin each day warming up with a strong focus on braking and downshifting exercises. With the new C7 Stingray's Active Rev Matching, downshifting and footwork timing are still critical elements. We will continue to teach heel/toe downshifting techniques, but the rev-matching feature will help get you up to speed much, much quicker.

Mind speed and decision-making are key elements in the high performance world. Our car control exercises and on-track training will help drivers improve their ability to process information quickly and accurately, resulting in a better coordination of eyes, hands and feet as well as improved speed and accuracy.

Following your 3 days of challenging and exhilarating activities with us, you will find yourself a more knowledgeable and confident performance driver!

Our school include catered lunch each day.
